

# Mini Carrier

Robust and payload-optimised: Introduction to the new generation of Mini Carrier HTM 3

Container transport

# Mini Carrier

The trailer for skip containers meets the requirements for any job with the HTS modular system.

The Mini Carrier is a manoeuvrable, payload-optimised trailer with a central axle design for skip containers according to DIN 30720 / 30720-1. It is specially designed for use on construction sites and in the disposal sector for short haul applications. The Mini Carrier packs a giant payload, is quickly hitched, and rolls with low fuel requirements. The Mini Carrier fits into parking spaces, so that the driver can quickly change containers in high-traffic city areas.

## Mini Carrier – Versions

The right solution for every application

Option:  
Closed floor, front loading

### Your benefits

- + Flexible use
- + Small manoeuvring space

Option: Special design for compactor equipment and special containers.

### Your benefits

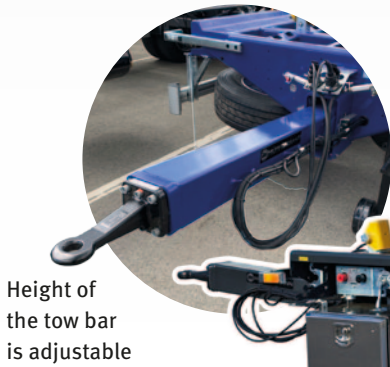

- + Chassis for high payload centres of gravity

## The new generation

The Mini Carrier impresses with an extended standard equipment for transporting container types according to DIN 30720 Part 1 and 2, pressing containers according to DIN 30730 (without rollers), AWILOG skip troughs and mini skip containers according to DIN 30735.

Height of the tow bar is adjustable

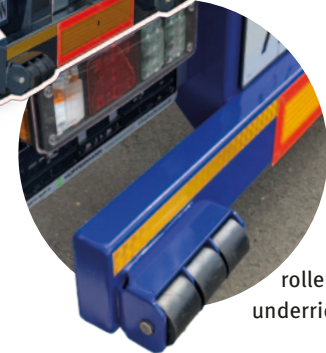

Central rear support thanks to drop landing leg

Preparation for operation of the "Multi-Fix" chain-free load securing as a standard

Pluggable Centring-Fix for adjustment to the set-down container sizes

Start-up rollers on the underride guard

### Combined load securing

The skips are fastened on the Mini Carrier with combined load securing. The skips are secured against sliding in the direction of travel and to the sides with adjustable stops. The containers are locked to the rear on the rear container mounting block with transverse lashing.

### Load securing Safety-Fix

Safety-Fix is a time-saving load securing version as an alternative to lashing with tensioning chains and offers a huge time advantage when securing the containers. The Mini Carrier in the version with Safety-Fix is equipped with an inwards-slanted console for ideal chain guiding.

#### Your benefits

- + Flexible use
- + Secure fastening

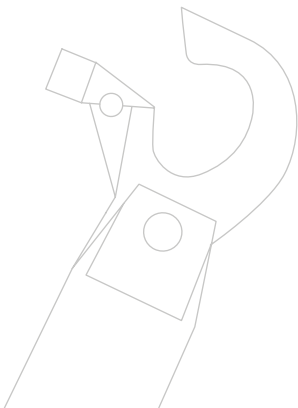

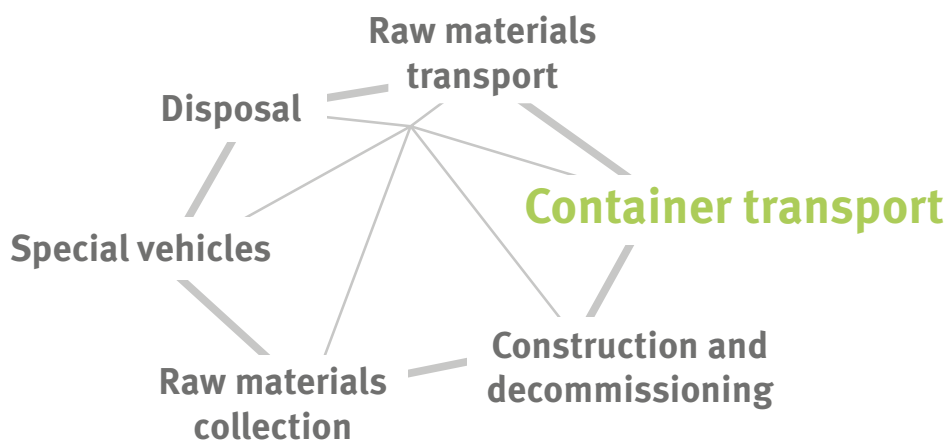

#### Your benefits

- + Easy handling
- + Time savings

We set standards as the market-leading manufacturer, showing off our strengths with detailed solutions for complete systems.
